WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/IL04/00279

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ This opinion has been established on the basis of a translation from the original language into the following language \_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY

International application No.  
PCT/IL04/00279

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>2,3,23-30,32 and 33</u>	YES
	Claims <u>1,4-22 and 31</u>	NO
Inventive step (IS)	Claims <u>23,26-30,32 and 33</u>	YES
	Claims <u>1-22 and 31</u>	NO
Industrial applicability (IA)	Claims <u>1-33</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 2, 3, 23-30, 32 and 33 meet the criteria of PCT Article 33(2) as the prior art fails to teach each limitation of the claimed subject matter.

Claims 1, 4-22 and 31 fail to meet the criteria of PCT Article 33(2) as Ferdinandy teaches compositions comprising TPEN and a pharmaceutically acceptable carrier, for inhibiting metalloprotease activity, treating ischemia-reperfusion injury, preventing the accumulation of nitric oxide and inhibiting the activity of a zinc-dependent enzyme.

Claims 1-22 and 31 fail to meet the criteria of PCT Article 33(3) as lacking an inventive step over Ferdinandy. The determination of an optimal concentration of the active agent is a parameter well within the purview of those skilled in the art.

Claims 23, 26-30, 32 and 33 meet the criteria of PCT Article 33(3) as having an inventive step over the prior art.

Claims 1-33 meet the criteria of PCT Article 33(4) as they are directed to methods of treating a pathological condition influenced by MMP, and compositions, particularly comprising TPEN, therefor.
